Sequence 306913, Application US/10257017B

Publication No. US20040241651A1

GENERAL INFORMATION:
APPLICANT: Christian Piepenbrock
APPLICANT: Christian Piepenbrock
APPLICANT: Kurt Berlin

TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNP TITLE OF INVENTION: methylations
FILE REFERENCE: E01/1193/WO
CURRENT APPLICATION NUMBER: US/10/257,017B
CURRENT APPLICATION ONUMBER: US/10/257,017B
CURRENT FILING DATE: 2002-04-07
PRIOR APPLICATION ONUMBER: US/10/257,017B
PRIOR FILING DATE: 2000-04-07
NUMBER OF SEQ ID NOS: 382046
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      밁
